PAPER REVIEWING MODULE - CONTENT REVIEWERS'S GUIDE

1.1 Getting started

As a content reviewer your responsibility is to give your opinion about the contribution's content. Firstly, you must log in to the system, then you will find a link `Content Reviewer Area` in the left menu under `My Conference`.

1.2 Content reviewer area

When you access the content reviewers area you will find a list of all the contributions that are assigned to you for judgement. You see the state of every contribution - if you have already judged a contribution or if the assigned referee has given the final judgement.

Paper Reviewing

Judge as Content Reviewer

Give advice on content of the contribution

Id	Title	State
0	contribution 1	Advice given
1	contribution 2	Advice not given yet

From the list you can click on a contribution's title and access the page which will allow you to judge that contribution. Once in that page, you should fill in the questions provided by the paper review manager. The comments that you write should help the Referee to give his judgement. As a final step, give your judgement of the content of the contribution: to be corrected, rejected, accepted. The authors of the contribution will receive an automatic e-mail notification containing your comments and judgement, if the Managers of the paper reviewing set this option.
